

51st ANNUAL

Catalog Samples Information Night

November 13, 2024

Sponsored by Rochester New York Chapter Construction Specifications Institute

Join CSI Rochester

Membership Opportunities

Professional

Technically experienced individual whose primary function is to author, manage, or communicate building information; to create, interpret, or use construction documents; or to educate, support, or assist the construction industry.

Emerging Professional

Individual who has less than three years' experience in any construction-related field and is a prospective Professional Member.

Student

Full-time student enrolled in an undergraduate or graduate program in a construction industry curriculum at an educational institution.

CSI is the only organization that meets the career advancement needs of professionals across all areas of the construction industry. The keys to our members' success? Making valuable contacts with decision-makers who can directly advance their careers, receiving professional recognition, and sharing information to do their jobs better.

HOME LEASING CONSTRUCTION, LLC
75 South Clinton Avenue, Suite 700
Rochester, NY 14604

Website: www.homeleasing.net

Email: jaredba@homeleasing.net

Home Leasing Construction LLC is sister company to Home Leasing LLC that specializes in the development of affordable homes. Our construction objective in the past has been to build with the goal of long-term ownership. This philosophy is present now as we build for others.

The company's 40 employees act solely as a General Contractor. The team includes Project Managers, Superintendents, Estimators, Accountants, other office support staff such as Contract Administration and Compliance. The top four employees have over 100 years of combined experience in all forms of construction.

Home Leasing Construction has roots that go back 50 years. The company culture and open-door policy created by Nelson Leenhouts drives the relationships with our team, partners, and customers as well as residents, suppliers, neighbors, investors and communities.

We undertook the rigorous B-Corp certification process to ensure our companies' operations, management practices, and governance remains in the best position to do the most good. This accreditation requires us to measure our performance and ensure that we are not driven by profits alone but in positive outcomes for the people we serve and the land or historic buildings we are entrusted with.

Our team's relationships in engineering, architecture, and government helps to alleviate problems in pre-construction before they start. We offer experience in all facets of construction including multi-family, senior, commercial, and institutional.

Our customer's goals, vision, and dreams become our own.

Home Leasing Construction offers services to a wide range of developers, including for-profit and not-for-profit affordable housing developers and commercial real estate developers from new construction of multi-family residential to adaptive re-use of historic buildings, rehabilitation of existing projects to commercial projects and renovations. The Construction team delivers quality and diligent work during the pre-construction phase to ensure that constructability issues are identified and addressed. During the construction phase, Home Leasing

HUBER ENGINEERED WOODS, AdvanTech
Zip System – Sheathing and Tape

ADVANTECH FLOORING AND SHEATHING

Build with AdvanTech® flooring for award-winning performance you can rely on. Specifically engineered to combine industry-leading strength, superior moisture resistance and installation ease, AdvanTech flooring is the FLAT OUT BEST™ for a quiet, stiff floor.

Total performance in one panel:

- High density engineered wood for industry leading strength and stiffness
- Advanced moisture resistant resin technology applied through the panel
- Superb fastener-holding power helps keep floors flat and quiet
- Patented fastening guide for easier installation
- Precisely milled and extremely durable tongue and groove profile for easy installation

- Ranked #1 in quality every year for more than a decade
- Backed by the reputation of Huber Engineered Woods with an industry-leading warranty and unmatched 500-day no-sanding guarantee, AdvanTech® flooring is the flooring panel that more builders trust. It's engineered for superior strength, moisture resistance and quality so you can build the quiet, stiff floor your homeowners demand. Build with the award-winning industry-leader and rest assured you'll get the most from your floors and everything you build on top of them.

ZIP SYSTEM SHEATHING & TAPE

It's a one-of-a-kind structural roof and wall system with a built-in energy-efficient barrier that keeps moisture out and reduces air leakage, while still allowing panels to properly dry. Plus, it installs in two easy steps: 1. Install the panels, 2. Tape the seams. Fewer steps result in 40% faster installation when compared to traditional housewrap and felt.

KEY FEATURES AND COMPONENTS OF ZIP SYSTEM® SHEATHING AND TAPE

- 1** High quality structural sheathing panel made of engineered wood delivers strength and durability
- 2** Built-in vapor permeable water-resistive barrier eliminates the hassles of house wrap and felt. Engineered for enhanced drainage of bulk water and optimal permeability to allow water vapor to pass through and promote drying
- 3** A continuous, rigid air barrier decreases unwanted air leakage for greater energy efficiency
- 4** ZIP System™ tape with a specially engineered, high performance acrylic adhesive bonds with ZIP System® panels for a permanent protective seal

ZIP SYSTEM R-SHEATHING

For installation convenience and exceptional, long-term performance, the all-in-one ZIP System® R-Sheathing panel provides a new approach to sealing and insulating the building envelope. One panel delivers thermal, air and moisture resistance, while providing excellent strength and durability.

- 1 Continuous Foam Insulation Provides Higher R-value**
 - Increases thermal performance while eliminating
 - Thermal bridging
 - Designed to meet new energy codes
- 2 Engineered Wood Provides Structure and Durability**
 - Nailable wood base for trim and accessories
 - Provides security against easy home intrusion
- 3 Built-In Water Resistive Barrier Eliminates Housewrap and Felt**
 - Eliminates costly rework
 - Instant rough dry-in with 180-day exposure guarantee
 - Superior drainage efficiency that channels moisture downward off the panel face. Permeable overlay promotes panel drying
- 4 Continuous Air Barrier Creates Greater Energy Efficiency**
 - Decreases unwanted air leakage into and out of a building

W**Booth #59**

- Helps protect the R-value of insulation, reducing heating and cooling costs

5 ZIP System™ Tape Permanently Seals All Panel Seams

- Acrylic formulation provides superior adhesion
- Rigorously tested for long-lasting performance
- Easily applied with tape gun and accessories

EXACOR™ Underlayment

EXACOR™ underlayment panels are specifically engineered to meet the fire-rating^[1], sound-rating^[1] and dimensional stability requirements of most multifamily and light commercial jobsites. Made of magnesium oxide and an integrated mesh core, EXACOR underlayment panels are fire resistant^[2]. In addition, EXACOR underlayment panels can offer a base for floor coverings that can eliminate the need for gypsum underlayment and the jobsite delays that may come with it.

EXACOR™ Wall Sheathing

EXACOR wall sheathing panels are fire-resistant^[1], high-density, structural magnesium oxide cement panels. When used as an exterior wall sheathing, EXACOR™ panels can replace other sheathing materials in certain assemblies, potentially reducing the number of layers required.

Limitations and restrictions apply to EXACOR™ sheathing used in exterior walls of Type III Construction that are greater than 40ft in height above grade plane. Please refer to ESL-1290 for more information on the use of EXACOR sheathing in NFPA 285 assemblies. EXACOR sheathing is not approved for use on Type I or II buildings except as noted in ESR 4635.

HUBER ENGINEERED WOODS, Zip System – Sheathing and Tape

It's a one-of-a-kind structural roof and wall system with a built-in energy-efficient barrier that keeps moisture out and reduces air leakage, while still allowing panels to properly dry. Plus, it installs in two easy steps: 1. Install the panels, 2. Tape the seams. Fewer steps result in 40% faster installation when compared to traditional housewrap and felt.

Key Features and Components of ZIP System® Sheathing and Tape

- 1 High quality structural sheathing panel made of engineered wood delivers strength and durability.
- 2 Built-in vapor permeable water-resistive barrier eliminates the hassles of house wrap and felt. Engineered for enhanced drainage of bulk water and optimal permeability to allow water vapor to pass through and promote drying.
- 3 A continuous, rigid air barrier decreases unwanted air leakage for greater energy efficiency.
- 4 ZIP System™ tape with a specially engineered, high performance acrylic adhesive bonds with ZIP System® panels for a permanent protective seal.

5-in-1 System with Layers of Innovation

For installation convenience and exceptional, long-term performance, the all-in-one ZIP System® R-Sheathing panel provides a new approach to sealing and insulating the building envelope. One panel delivers thermal, air and moisture resistance, while providing excellent strength and durability.

- 1 **Continuous Foam Insulation Provides Higher R-value**
 - Increases thermal performance while eliminating thermal bridging
 - Designed to meet new energy codes
- 2 **Engineered Wood Provides Structure and Durability**
 - Nailable wood base for trim and accessories
 - Provides security against easy home intrusion
- 3 **Built-In Water Resistive Barrier Eliminates Housewrap and Felt**
 - Eliminates costly rework
 - Instant rough dry-in with 180-day exposure guarantee
 - Superior drainage efficiency that channels moisture downward off the panel face
 - Permeable overlay promotes panel drying
- 4 **Continuous Air Barrier Creates Greater Energy Efficiency**
 - Decreases unwanted air leakage into and out of a building
 - Helps protect the R-value of insulation, reducing heating and cooling costs
- 5 **ZIP System™ Tape Permanently Seals All Panel Seams**
 - Acrylic formulation provides superior adhesion
 - Rigorously tested for long-lasting performance
 - Easily applied with tape gun and accessories

HUBER ENGINEERED WOODS, Zip System – Liquid Flash

ZIP System™ Liquid Flash is a liquid-applied flashing membrane made of STPE (silyl-terminated-polyether) technology. This high-performance formulation combines the durability of silicones with the toughness of urethanes

1 Optimal Viscosity

Flows easily to seal irregular shapes and surfaces.

2 Quick Cure Time

Immediately weather resistant and tack free in as little as 20–40 minutes depending on conditions. Target thickness achieved when substrate is no longer visible.

3 Weather and UV Resistant

Warranted for up to 180 days of extreme weather and UV exposure.

4 Proper Adhesion to a Wide Range of Surfaces

Bonds to wood, concrete, masonry, architectural metals, glass, PVC, FRP, EPDM and most other building materials.

ROCKWOOL, Mineral Fiber Insulation

ROCKWOOL Cavityrock® is a semi-rigid insulation board designed for exterior cavity wall and rainscreen applications. These products offer superior long-term thermal efficiency, fire resistance, moisture control, acoustic performance and are compatible with numerous framing systems and cladding attachment systems.

Also available in a black mat facer finish for open-joint cladding systems, Cavityrock® Black combines your insulation install with masking in a single step, reducing installation time and material cost to achieve your desired design aesthetic.

ROCKWOOL Comfortboard® 80 is a rigid stone wool board designed for continuous insulation applications. A non-structural sheathing product, Comfortboard 80 provides increased thermal performance to the building envelope.

ROCKWOOL Comfortboard® 110 is a rigid, high-density, non-combustible, stone wool insulation board designed for use as an exterior continuous insulation in commercial.

ROCKWOOL Comfortbatt® is a stone wool insulation product for use in wood and steel framing in both new residential and commercial builds and renovations. This semi-rigid batt has a unique flexible edge designed to compress as the batt is inserted into walls, attics, ceilings and floor frame applications.

Proven Performance Since 1996. SITURA INC., is a global leading supplier and manufacturer of Waterproof Expansion Joints for roofing and waterproofing applications. Each Waterproof Expansion Joint is custom fabricated and engineered to fit any design condition.

SITURA RedLINE®, FlamLINE® and AquaLINE® Waterproof Expansion Joints are the industry standard in quality assurance and reliability for monolithic, zero profile, maintenance free expansion joints in commercial and industrial roofing and waterproofing.

SITURA Waterproof Expansion Joints are specifically designed and engineered for use in a wide variety of applications, ranging from single ply membrane tie-ins to large-scale displacement seismic joints, without obstructing drainage and eliminating water ponding.

SITURA is committed to technical excellence and expertise in providing waterproof expansion joint solutions that are supplied on demand.

SITURA Joints are the only waterproof expansion joints with verified Environmental Product Declarations (EPDs).

GUARDIAN INDUSTRIES

2300 Harmon Road
Auburn Hills, MI 48326

Website: www.guardianglass.com

Email: atoadvine@guardian.com

Guardian Industries is a diversified global manufacturing company with leading positions in float glass, low-e coatings and fabricated glass products. Our local float glass production facility is located in Geneva, New York and we would love to take you on a tour of our facility.

[Guardian SunGuard® Advanced Architectural Glass](#) helps architects create striking building designs using natural light and color – while significantly reducing energy costs. **SunGuard Advanced Architectural Glass** is all about helping architects “See What’s Possible” and offer the most comprehensive range of coatings, colors and design solutions in the industry, while still meeting complex energy and performance requirements.

Glass can pose an invisible threat for birds, made more hazardous by location, lighting, landscaping and more. Guardian has created an extensive line of Bird Friendly products – under our Guardian Bird 1st product line. Guardian bird-friendly solutions pair with your favorite SunGuard® low-E coatings to help meet energy performance requirements and support LEED bird collision deterrence. Tested by the American Bird Conservancy for proven effectiveness, so you can build better for birds without sacrificing performance or aesthetic. We find these products to be beneficial in meeting the requests of many clients in the higher education and healthcare project segments.

Guardian Glass continues to focus on innovation, developing products that help to meet updated energy code requirements and aesthetic trends. Guardian’s new SunGuard™ SNX 70+ low-e coating is the latest triple silver coating developed to offer a high light-to-solar gain ratio and enhanced color neutrality compared to previous triple-silver coating options. On clear glass, SNX 70+ offers that has a visible light transmission of 66% and a 0.28 solar heat-gain coefficient on clear glass. Continued to focus on color neutrality, Guardian also recently launched our CrystalClear™ low-iron glass substrate. CrystalClear was developed specifically for us in the exterior façade. CrystalClear offers 67% more color neutral

appearance over standard clear glass with greater affordability compared to conventional low-iron glass alternatives.

Guardian has developed easy-to-use, advanced software for glass and glazing system analysis. These online tools offer a comprehensive suite of engineering and analytical reports that demonstrate the advantages of high-performance glass in building facades. Please ask about gaining access to our **Glass Performance Calculator, Building Energy Calculator, BIM Generator and Glass Visualizer.**

ROCKWOOL, Mineral Fiber Insulation

ROCKWOOL Curtainrock® 40/80 is a semi-rigid stone wool insulation board designed to provide enhanced fire protection in curtain wall and perimeter fire containment systems. Curtainrock® 40/80 is available unfaced or with vapor retarding foil facing in 4 and 8 lb/cubic ft. densities.

ROXUL Safe® is a semi-rigid, mineral wool batt insulation designed to provide enhanced fire protection in perimeter fire containment systems, floor and wall through penetrations, construction joints, and other fire stopping applications.

These products are typically combined in a number of UL tested ASTM 2307 compliant assemblies.
